WILL AID GRAZIERS.

Live Stock Men to Form Close Body.

With a degree of enthusiasm which was worthy of the cause, the graziers of the Islands met in considerable force at the directors' of Castle & Cooke at Honolulu last week and formed the Hawaiian Live Stock Breeders' Association. There have been 26 names attached to the articles of association.

The meeting indicated that there will be good work done by the association, for every man present seemed to feel that the time was here for concerted action upon the matter at hand, and there was not a single person chosen to act for the body who did not willingly take up the task. The first gathering was held in the morning, and at that time D. P. R. Isenberg was chosen chairman and P. M. Swanzy temporary secretary. Then an adjournment was had for the purpose of getting together more of the cattlemen of the city, so the meeting held at 2 p. m. was one full of interest. The permanent officers were first chosen. They were: President, D. P. R. Isenberg; vice president, Eben Low; secretary, A. F. Judd; treasurer, A. B. Wood. Executive Committee: L. L. McCandless, A. W. Carter, W. H. Conwell, Francis Gray and Julian Monsarrat.

The by-laws of the association were then adopted. They declare the purpose of the association to be the bettering of the live stock of the Islands, the conserving of the interests of the graziers, the improvement of the pasturage lands and the forage plants, the care of the forests and the reforestation of the lands of the Islands. The principal object of the association will be the bringing and breeding of a better class of horses and cattle. After these sheep will run a third with attention to hogs as the subject which will attract the least attention of all.

There were very few changes in the by-laws or articles of association, and before the adjournment of the meeting all the groundwork had been laid for an association which would give to the association wide latitude. A special committee on herd book, composed of W. H. Conwell, Eben Low and Julian Monsarrat, was appointed, and when the meeting adjourned it was to be called together again on Saturday, when it is expected there will be a system of registration prepared by the committee. There will be submitted as well a complete plan for affiliation with the Live Stock Association of the United States, which will give full weights to the registration of the association.

The names of the articles of association are the following: The Hawaiian Agricultural Company, R. C. Searles, L. Von Tempsky, J. Monsarrat, E. Lowe, F. M. Swanzy, Palmer and Frank Woods, M. P. Robinson, W. M. Giffard, A. W. Carter, W. C. Achi, A. Mason, Robert Hind, J. M. Horner, A. F. Judd, Dr. J. H. Raymond, H. Waterhouse & Co., H. P. Baldwin, Samuel Parker, W. H. Conwell, Prince David Kawanakoa, H. M. von Holt, S. E. Damon, C. A. Brown, A. Dowsett, L. L. McCandless, George Campbell and Samuel Parker Jr.

It is the fond hope of the growers that in time they become to the cattle interests of Hawaii what the Planters' Association now is to the sugar business. There will be not only a registry, but as well there will be prepared a set of rules for the carrying on of a regular information bureau, and in time there will be brochures, which will aid in the dissemination of the facts concerning the industry here, and investigations made by the graziers which will serve their fellows.

TEN THOUSAND HORSE-POWER.

Canadian Enterprise More Daring Than American at Niagara.

When the project for the development of the power of Niagara falls was undertaken, a few years ago, all previous efforts of electrical engineers were far outdone. It had

been found possible at that time to build electric generators which would deliver an output of 1,500 horse-power, and it was said that possibly it would be practical to increase the size of generators to 2500 horse-power. The Niagara falls power company undertook and accomplished what was then thought little short of miraculous, in building, installing, and putting into successful operation dynamos of 5,000 horse-power size.

It was then thought that the limit in the development of electric machinery had been reached, at least for this generation. The plant at Niagara, with its mammoth units of energy, was considered one of the industrial wonders of the world and excited as much interest among visiting scientists from this and other countries as the spectacle of the great Niagara falls itself. There have been a number of immense electrical plants built since then in various parts of the country, and the Niagara plant has been increased in size. But the enormous generators first built there remained up to a short time ago as the limit of electrical development. Now the Niagara falls plant is about to be outdone. The Niagara Falls power company, has undertaken to build a plant on the Canadian side of the falls which will be as far ahead of the present plant as the latter outdistanced all others. In this new plant, which is expected to have an output of 200,000 horse-power or more within a few years, it is planned to install electric generators which will each have a capacity of 10,000 horse-power, and contracts have already been let to an American company for building them. These new dynamos are to be the industrial wonder of the day. Each of them is to be capable of producing as much power as is used to run a transatlantic steamer. Up to a short time ago the entire power of the Chicago Edison company's downtown plant was not as great as one of the new dynamos. All the industries of a fair-sized city could be carried on by the power from one of these machines. The undertaking is an enormous one, but has proceeded successfully so far and is assured of success. The lesson it teaches is that the limit of electrical achievement was not reached at Niagara and doubtless has not yet been reached. In fact, judging from the progress of the last fifteen years, electrical development has no limit in sight.

A Patented Comb.

They cure dandruff, hair falling, headache, etc., yet cost the same as an ordinary comb. Dr. White's Electric Comb. The only patented Comb in the world. People, everywhere it has been introduced, are wild with delight. You simply comb your hair each day, and the comb does the rest. This wonderful comb is simply unbreakable and is made so that it is absolutely impossible to break or cut the hair. Sold on a written guarantee to give perfect satisfaction in every respect. Send stamps for one. Ladies' size, 50c. Gent's size, 35c. Live men and women wanted everywhere to introduce this article. Sells on sight. Agents are wild with success. Address D. N. ROSE, Gen Mgr. **Manufacturers of Pure Bone Fertilizers
and Pure Bone Meal.**

DEALERS IN

**Fertilizer Materials
of Every Description.**

Have constantly on hand the following goods adapted to the Island trade:

HIGH GRADE CANE MANURE, DIAMOND A FERTILIZERS, NITRATE OF SODA, SULPHATE OF AMMONIA, HIGH GRADE SULPHATE OF POTASH, FISH GUANO, WOOL DUST, ETC.

Special Manures Manufactured to Order.

The Manures manufactured by the CALIFORNIA FERTILIZER WORKS are made entirely from clean bone treated with acid, Dry Blood and Flesh, Potash and magnesia Salts. No adulteration of any kind is used, and every ton is sold under a guaranteed analysis. One ton or one thousand tons are almost exactly alike, and for excellent mechanical condition and high analysis have no superior in the market. The superiority of Pure Bone over any other Phosphatic material for Fertilizer use is so well known that it needs no explanation. The large and constantly increasing demand for the Fertilizers manufactured by the California Fertilizer Works is the best possible proof of their superior quality.

A Stock of "DIAMOND A" Fertilizer will be kept constantly on hand and for sale on the usual terms, by **L. TURNER CO., Ltd., Hilo.**

For Terms of Sale, which are equivalent to San Francisco prices with freight and other charges added, address:
